DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 4, drawn to a package shell over layer, classified in class 428, subclass 34.1.
 - II. Claims 5 - 7, drawn to a package shell cover layer processing procedure, classified in class 264, subclass 132.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II, claims 5 - 7 and Group I, claims 1 - 4 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case shell cover layer can be formed using a materially different process such as vacuum molding the sheet and then placing the color design on the formed surface in the desired pattern.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1772

4. A telephone call was made to Keith Kline on December 5, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
